Corrigendum # 3 of RFP

This has reference to Request for Proposal (RFP) published on 25-07-2018 regarding “Selection of Master System Integrator (MSI) for Implementation of Smart Solutions in Rourkela”

Following modifications have been made to the RFP No. RSCL/110/2018/352 dated 25.07.2018 in continuation to the previous Corrigendum released on 13.09.2018 and 28.10.2018:

Introduction to Corrigendum

The Guiding Principles of our RFP and our Corrigendum is to ensure broad participation.

Our Sub Section(s) on “Responsibility of MSI” specifies that the technical specifications are indicative in nature. Also these technical and functional specifications have been provided with the intent to ensure a minimum benchmark of standardized products on the basis of existing /expected workloads. These are to provide guidance and direction and are not expected to be prescriptive in nature.

To reemphasize the same:

- a. The MSI has the option to address all the technical/functional requirements either with one or multiple solution (where applicable). The MSI is expected to depict compliance to all the functional and technical requirements along with detailing of the logical, functional and technical architecture by mapping of their BOM to the solution.
- b. The MSI may configure modules, interfaces and applicable peripherals for any technology product (as applicable) in a technically feasible and optimal manner, such that they comply with the functional technical and minimal sizing requirements as specified in the RFP.
- c. MSI is responsible for the overall SLA and scalability on the basis of their independent assessment of the requirements
