9	HMCHR/B/509	LIDHIA MUNDA	38	F	ROURKELA PIN CODE- 769004 MOB- 8480521492	NP SWAB	17/04/2021	NEGATIVE	MICROBIOLOGY
10	HMCHR/B/510	DR PRASANT KUMAR	57	M	RGH STAFF ROURKELA PIN CODE- 769004 MOB- 9437111258	NP SWAB	17/04/2021	NEGATIVE	MICROBIOLOGY
11	HMCHR/B/511	LILY MUNDARI	40	F	CHHEND ROURKELA PIN COEE- 769015 MOB- 9040315471	NP SWAB	17/04/2021	NEGATIVE	MICROBIOLOGY

Checked and Approved

Checked and Approved by

Note: The results relate only to the specimens tested and should be correlated with clinical findings. Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/ through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.\*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. Therepeat specimens maybe considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.\*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.\*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of co infections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
