

## Test Report

Date and time of reporting (dd/mm/yyyy) : 12 hour format	02/05/2021
Address of the referring facility/Hospital	CDM & PHO, ROURKELA
<b>SPECIMEN DETAILS</b>	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	30/04/2021
Condition of specimen received / Quality on arrival	Under cold chain
<b>REPORTING DETAILS</b>	

SL NO	Sample ID	Patient Name	Age	Gender	Specimen Type	Date of sample testing	Result 2019-nCoV RT PCR
<b>RTPCR DAILY SWAB COLLECTION CHC- BISRA - 29 APRIL 2021</b>							
1	nCoV8L2893	SONIYA KUJUR	22	M	NPS/TS	02.05.2021	NEGATIVE
2	<b>nCoV8L2894</b>	<b>JASABANTA MAHATO</b>	<b>28</b>	<b>M</b>	NPS/TS	02.05.2021	NEGATIVE
3	nCoV8L2895	MUTUN KUMAR SURIN	36	M	NPS/TS	02.05.2021	NEGATIVE
4	nCoV8L2896	SURESH ORAM	52	M	NPS/TS	02.05.2021	NEGATIVE
5	nCoV8L2897	SILA SINGH ORAM	49	F	NPS/TS	02.05.2021	NEGATIVE
6	nCoV8L2898	SAIF ALI	25	M	NPS/TS	02.05.2021	NEGATIVE
9	nCoV8L2901	M BASIDEV	59	M	NPS/TS	02.05.2021	NEGATIVE
10	nCoV8L2902	TULSI KUJUR	45	M	NPS/TS	02.05.2021	NEGATIVE
11	nCoV8L2903	PIYARI MUNDARY	30	F	NPS/TS	02.05.2021	NEGATIVE
12	<b>nCoV8L2904</b>	<b>KALEBAR MUNDARY</b>	<b>20</b>	<b>M</b>	NPS/TS	02.05.2021	NEGATIVE
13	nCoV8L2905	CHAYA MUNDARY	45	F	NPS/TS	02.05.2021	NEGATIVE
14	nCoV8L2906	ANJALI RANI	17	F	NPS/TS	02.05.2021	NEGATIVE
15	nCoV8L2907	NARENDRA MAHATO	26	M	NPS/TS	02.05.2021	NEGATIVE
16	nCoV8L2908	SAMARKANT SATYARTHY	33	M	NPS/TS	02.05.2021	NEGATIVE
17	nCoV8L2909	AKHSYA KUMAR LENKA	51	M	NPS/TS	02.05.2021	NEGATIVE
18	nCoV8L2910	SAGARIKA DAS	33	F	NPS/TS	02.05.2021	NEGATIVE
19	nCoV8L2911	GEETANJALU SAHOO	24	F	NPS/TS	02.05.2021	NEGATIVE
20	nCoV8L2912	ANKIT AGARWAL	26	M	NPS/TS	02.05.2021	NEGATIVE
21	nCoV8L2913	JITENDRA SHARMA	30	M	NPS/TS	02.05.2021	NEGATIVE

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.\*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.\*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.\*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Department of Microbiology  
S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.\*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.\*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.\*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

## Test Report

S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.\*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.\*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.\*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
