

Test Report

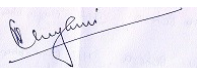

Date and time of reporting (dd/mm/yyyy) : 12 hour format	03/05/2021
Address of the referring facility/Hospital	CDM & PHO, ROURKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	02/05/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

SL NO	Sample ID	Patient Name	Age	Gender	Specimen Type	Date of sample testing	Result 2019-nCoV RT PCR
1	nCoV8L6574	BUSWAJEET SAMAL	24	M	NPS/TS	03.05.2021	NEGATIVE
2	nCoV8L6575	HARAMOHAN BISWAL	33	M	NPS/TS	03.05.2021	NEGATIVE
3	nCoV8L6576	MALAYA BEHERA	37	M	NPS/TS	03.05.2021	NEGATIVE
4	nCoV8L6580	ABHILASH TIGGA	19	M	NPS/TS	03.05.2021	NEGATIVE
5	nCoV8L6581	FULJENCE TIGGA	52	M	NPS/TS	03.05.2021	NEGATIVE
6	nCoV8L6582	ANMOL TIGGA	7	M	NPS/TS	03.05.2021	NEGATIVE
7	nCoV8L6583	DURYADHAN DAS	51	M	NPS/TS	03.05.2021	NEGATIVE
8	nCoV8L6584	SANTOSH KUMAR PRUSTY	27	M	NPS/TS	03.05.2021	NEGATIVE
9	nCoV8L6585	ASISH KUMAR SAHOO	25	M	NPS/TS	03.05.2021	NEGATIVE
10	nCoV8L6586	SURESH SAMASI	23	M	NPS/TS	03.05.2021	NEGATIVE
11	nCoV8L6587	BABITA GOUD	43	F	NPS/TS	03.05.2021	NEGATIVE
12	nCoV8L6588	ANJAN SAMAL	45	M	NPS/TS	03.05.2021	NEGATIVE
13	nCoV8L6589	ASHOK KUMAR SAMAL	48	M	NPS/TS	03.05.2021	NEGATIVE
14	nCoV8L6590	HEMANTA KUMAR SINH	37	M	NPS/TS	03.05.2021	NEGATIVE
15	nCoV8L6591	RANJULATA SAHOO	32	F	NPS/TS	03.05.2021	NEGATIVE
16	nCoV8L6592	USHA BADAIAK	38	F	NPS/TS	03.05.2021	NEGATIVE
17	nCoV8L6593	DEEPAK MUNARI	19	M	NPS/TS	03.05.2021	NEGATIVE
18	nCoV8L6594	NARASINGH SINGH	33	M	NPS/TS	03.05.2021	NEGATIVE
19	nCoV8L6595	PRIYA RANJAN MAHNDIA	33	M	NPS/TS	03.05.2021	NEGATIVE
20	nCoV8L6596	RANJT BADAIAK	50	M	NPS/TS	03.05.2021	NEGATIVE

Checked and Approved by

 SCB Medical College, Cuttack

 Professor & Head
 Department of Microbiology
 S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

 Associate Professor
 Dept. of Biochemistry
 SCB Medical College, Cuttack

 Professor & Head
 Department of Microbiology
 S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
