

Test Report

Date and time of reporting (dd/mm/yyyy) : 12 hour format	05/06/2021
Address of the referring facility/Hospital	CDM & PHO- ROURKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	04/06/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

Sl. No.	Sample ID	SRF ID	Patient Name	Age	Sex	Specimen type	Date of sample testing	Result 2019-nCoV RTPCR
1	nCoV9L35397	2137300527652	B K SAHOO	55	M	NP. Swab	5/6/2021	NEGATIVE
2	nCoV9L35398	2137300527706	KHIROD KU SAMAL	19	M	NP. Swab	5/6/2021	NEGATIVE
3	nCoV9L35399	2137300527744	MAHADEV XALXO	28	M	NP. Swab	5/6/2021	NEGATIVE
4	nCoV9L35400	2137300527761	BISRA KHALAKHO	36	M	NP. Swab	5/6/2021	NEGATIVE
5	nCoV9L35401	2137300527773	P C NAYAK	48	M	NP. Swab	5/6/2021	NEGATIVE
6	nCoV9L35402	2137300527781	RITESH KUMAR	22	M	NP. Swab	5/6/2021	NEGATIVE
7	nCoV9L35403	2137300527793	MIRA DAS	42	F	NP. Swab	5/6/2021	NEGATIVE
8	nCoV9L35404	2137300527803	MANDHAR BEHERA	44	M	NP. Swab	5/6/2021	NEGATIVE
9	nCoV9L35405	2137300527812	ROHIT KUMAR BINDHANI	21	M	NP. Swab	5/6/2021	NEGATIVE
10	nCoV9L35406	2137300527818	NAROTTAM SEN	21	M	NP. Swab	5/6/2021	NEGATIVE
11	nCoV9L35407	2137300527827	PRIYANKA KERKETTA	18	F	NP. Swab	5/6/2021	NEGATIVE
12	nCoV9L35408	2137300527833	PRAMOD KU BEHERA	32	M	NP. Swab	5/6/2021	NEGATIVE
13	nCoV9L35409	2137300527844	ABHIJEET MINZ	23	M	NP. Swab	5/6/2021	NEGATIVE
14	nCoV9L35410	2137300528968	JAGDISH BOLONGIA	27	M	NP. Swab	5/6/2021	NEGATIVE
15	nCoV9L35411	2137300528984	SUMINDRA BOLANGIA	28	M	NP. Swab	5/6/2021	NEGATIVE
16	nCoV9L35412	2137300528988	ALBON MAJHI	30	M	NP. Swab	5/6/2021	NEGATIVE

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeats sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeated specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
