

Test Report

Date and time of reporting (dd/mm/yyyy) : 12 hour format	07/05/2021
Address of the referring facility/Hospital	CDM & PHO, ROURKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	06/05/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

SL NO	Sample ID	Patient Name	AGE	GENDER	Specimen Type	Date of sample testing	Result 2019-nCoV RT PCR
1	nCoV8L43903	BINAPANI MOHAPATRA	52	F	NPS/TS	07.05.2021	NEGATIVE
2	nCoV8L43904	JASBINDER SINGH	55	M	NPS/TS	07.05.2021	NEGATIVE
3	nCoV8L43905	DEVAJANI MOHANTY	45	F	NPS/TS	07.05.2021	NEGATIVE
4	nCoV8L43906	SAGAR GOPE	31	M	NPS/TS	07.05.2021	NEGATIVE
5	nCoV8L43907	SHANKAR BAHADUR	54	M	NPS/TS	07.05.2021	NEGATIVE
6	nCoV8L43908	BABULI KHADGE	44	M	NPS/TS	07.05.2021	NEGATIVE
7	nCoV8L43909	BASANT DEHURY	65	M	NPS/TS	07.05.2021	NEGATIVE
8	nCoV8L43910	ARNAPURNA RAY	65	M	NPS/TS	07.05.2021	NEGATIVE
9	nCoV8L43911	PRAMILA DHAL	47	F	NPS/TS	07.05.2021	NEGATIVE
10	nCoV8L43912	RASHMANI MUNDARI	35	F	NPS/TS	07.05.2021	NEGATIVE
11	nCoV8L43913	HEMANTA SEKHAR MAHANTA	24	M	NPS/TS	07.05.2021	NEGATIVE
12	nCoV8L43914	SADANANDA BASAD	26	M	NPS/TS	07.05.2021	NEGATIVE
13	nCoV8L43915	RAMAYAN BASAD	22	M	NPS/TS	07.05.2021	NEGATIVE
14	nCoV8L43916	SASHIKANT DAS	35	M	NPS/TS	07.05.2021	NEGATIVE
15	nCoV8L43917	LAXMI NAYAK	45	F	NPS/TS	07.05.2021	NEGATIVE
16	nCoV8L43918	SOBHAKAR MAHANANDIA	54	M	NPS/TS	07.05.2021	NEGATIVE
17	nCoV8L43919	SHANTILATA SAHOO	45	F	NPS/TS	07.05.2021	NEGATIVE
18	nCoV8L43920	DEBABANDHU LENKA	55	M	NPS/TS	07.05.2021	NEGATIVE
19	nCoV8L43921	SANDIP DAS	25	M	NPS/TS	07.05.2021	NEGATIVE
20	nCoV8L43922	SUNITA XESS	25	F	NPS/TS	07.05.2021	NEGATIVE

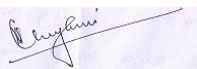

Checked and Approved by

Dr. Pareshnath Mohanty

Professor & Head
Department of Microbiology
S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 - 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Professor & Head
Department of Microbiology
S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR- National Institute of Virology, Pune
