

Test Report

Date and time of reporting (dd/mm/yyyy) : 12 hour format	15/04/2021
Address of the referring facility/Hospital	CDMO&PHO ,ROURKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	14/04/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

SL NO	Sample ID	Patient Name	Age	Gender	Specimen Type	Date of sample testing	Result 2019-nCoV RT PCR
1	nCoV7L20455	NIGAMA NANDA PRADHHAN	63	M	NPS/TS	15.04.2021	NEGATIVE
2	nCoV7L20456	BASANTI DEVI	62	F	NPS/TS	15.04.2021	NEGATIVE
3	nCoV7L20457	MUGIYA XALXO	22	F	NPS/TS	15.04.2021	NEGATIVE
4	nCoV7L20423	ADITYA SAW	11	M	NPS/TS	15.04.2021	NEGATIVE
5	nCoV7L20430	LUES XAXA	52	M	NPS/TS	15.04.2021	NEGATIVE
6	nCoV7L20433	OISIKHA CHAKRABORTY	21	F	NPS/TS	15.04.2021	NEGATIVE
7	nCoV7L20434	SANGEETA CHAKRABORTY	52	F	NPS/TS	15.04.2021	NEGATIVE
8	nCoV7L20435	SUBHAK SINGH	53	M	NPS/TS	15.04.2021	NEGATIVE
9	nCoV7L20436	RANJAN KUMAR PATEL	51	M	NPS/TS	15.04.2021	NEGATIVE
10	nCoV7L20440	BIRANCHI NARAYAN KUMBHAR	58	M	NPS/TS	15.04.2021	NEGATIVE
11	nCoV7L20442	PRIYANKA NAYAK	18	F	NPS/TS	15.04.2021	NEGATIVE
12	nCoV7L20443	TILOTAMA NAYAK	79	F	NPS/TS	15.04.2021	NEGATIVE
13	nCoV7L20444	PURNA CHANDRA JENA	60	M	NPS/TS	15.04.2021	NEGATIVE
14	nCoV7L20447	SAMNI SARDAR	37	F	NPS/TS	15.04.2021	NEGATIVE
15	nCoV7L20448	MADHUSMITA MINZ	30	F	NPS/TS	15.04.2021	NEGATIVE
16	nCoV7L20449	JHUNURANI PANDA	23	F	NPS/TS	15.04.2021	NEGATIVE
17	nCoV7L20450	PRITAM KUMAR NAYAK	25	M	NPS/TS	15.04.2021	NEGATIVE
18	nCoV7L20459	PANU MAJHI	45	M	NPS/TS	15.04.2021	NEGATIVE

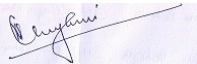

Checked and Approved by

S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Associate Professor
Dept. of Biochemistry
SCB Medical College, Cuttack

Professor & Head
Department of Microbiology
S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
