

DEPARTMENT OF MICROBIOLOGY ISPAT GENERAL HOSPITAL SAIL, RSP, ROURKELA

Covid-19 (RT-PCR) Test Report

Date and time of reporting	12.04.2021; 05:30 P.M. Rourkela Government Hospital, Rourkela			
Address of the referring facility/Hospital				
SPECIMEN DETAILS				
Date & Time of sample collection	11.04.2021 12.04.2021; 11:30 A.M.			
Date & Time of receipt of specimen				
Condition of specimens received / Quality on arrival				
REPORTING DETAILS	Acceptable			

Sr. No.	Sample ID	Patient Name	Age	Sex	Specimen type	Date of sample testing	Result 2019-nCoV
1.	Cov/50763	Dinesh Ku Agrwal	52	Male	Nasal Swab	12.04.2021	N
2.	Cov/50764	Bikash Goel	41	Male			Negative
3.	Cov/50766	DologobiadaN	-		Nasal Swab	12.04.2021	Negative
		Dolagobinda Nayak	53	Male	Nasal Swab	12.04.2021	Negative
4.	Cov/50768	Gurmit Singh	30	Male	Nasal Swab		
5.	Cov/50770	Wilson Dungdung				12.04.2021	Negative
_			34	Male	Nasal Swab	12.04.2021	Negative
6.	Cov/50771	Soumya Ranjan Senapati	21	Male	Nasal Swab	12.04.2021	Negative

Prepared by:

Hemanti Sabar

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Checked and Approved by:

Dr. Ashit Bhusan Xess

डा. अशीत भूषन खेस

*A repeat sample after proper collection should be sent for the inconclusive results/ inappropriate samples/rejected sample Microbiologist Dr. ASHIT BHUSAN XESS Interpretation guidance:-SAIL, RSP, IGH, Rourkeia

- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/ any other health care facility affirming requirements of the case definition/s. A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection*
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimens may be considered after a gap of 2 - 4 days after the collection of the first specimen for additional testing if required. *
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of
