

Test Report

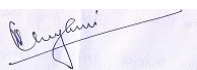

Date and time of reporting (dd/mm/yyyy) : 12 hour format	12/04/2021
Address of the referring facility/Hospital	CDM & PHO, ROULKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	11/04/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

SI No	Sample ID	Patient Name	Age	Gender	Specimen Type	Date of sample testing	Result 2019-nCoV
1	nCoV7L9507	SHIBAM RANA	7 Months	F	NPS/TS	12.04.2021	NEGATIVE
2	nCoV7L9508	AMBUJLOCHAN BEHERA	21	M	NPS/TS	12.04.2021	NEGATIVE
3	nCoV7L9509	FAKIR MOHAR	62	M	NPS/TS	12.04.2021	NEGATIVE
4	nCoV7L9510	ALEYAMMA ABRAHAM	63	M	NPS/TS	12.04.2021	NEGATIVE
5	nCoV7L9511	SITA MOHANTY	22	F	NPS/TS	12.04.2021	NEGATIVE
6	nCoV7L9512	CHARLES ABRAHAM	65	F	NPS/TS	12.04.2021	NEGATIVE
7	nCoV7L9513	CHARLIE ABRAHAM	29	M	NPS/TS	12.04.2021	NEGATIVE
8	nCoV7L9514	RINKU MAITY	25	M	NPS/TS	12.04.2021	NEGATIVE
9	nCoV7L9515	BIJAY KUMAR BEHERA	35	F	NPS/TS	12.04.2021	NEGATIVE
10	nCoV7L9516	GURBACHAN KAUR	36	M	NPS/TS	12.04.2021	NEGATIVE
11	nCoV7L9517	CHITARANJAN CHHANDA	36	M	NPS/TS	12.04.2021	NEGATIVE
12	nCoV7L9518	SHAURYA VERMA	10	M	NPS/TS	12.04.2021	NEGATIVE
13	nCoV7L9519	CHARANPAL VERMA	45	M	NPS/TS	12.04.2021	NEGATIVE
14	nCoV7L9520	BIDHI VERMA	42	F	NPS/TS	12.04.2021	NEGATIVE
15	nCoV7L9521	RAJANI VERMA	24	F	NPS/TS	12.04.2021	NEGATIVE
16	nCoV7L9522	PRATAP TOPPO	14	M	NPS/TS	12.04.2021	NEGATIVE

 Professor & Head
 Department of Microbiology
 S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
