

Test Report

Date and time of reporting (dd/mm/yyyy) : 12 hour format	08/04/2021
Address of the referring facility/Hospital	CDM & PHO, ROURKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	08/04/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

SL NO	Sample ID	Patient Name	Age	Gender	Specimen Type	Date of sample testing	Result 2019-nCoV RT PCR
1	nCoV6L79636	MD IQBAL	63	M	NPS/TS	08.04.2021	NEGATIVE
2	nCoV6L79637	AMIT KUMAR NAYAK	32	M	NPS/TS	08.04.2021	NEGATIVE
3	nCoV6L79638	BENEDIT LAKRA	32	M	NPS/TS	08.04.2021	NEGATIVE
4	nCoV6L79639	BIDHI PANDEY	29	F	NPS/TS	08.04.2021	NEGATIVE
5	nCoV6L79641	KALPAJEET BARIK	4	M	NPS/TS	08.04.2021	NEGATIVE
6	nCoV6L79642	KANHU CHARAN BARIK	50	M	NPS/TS	08.04.2021	NEGATIVE
7	nCoV6L79643	SANJUKTA BARIK	45	F	NPS/TS	08.04.2021	NEGATIVE
8	nCoV6L79644	SONIA SETHI	20	F	NPS/TS	08.04.2021	NEGATIVE
9	nCoV6L79645	NISA CHHETRI	20	F	NPS/TS	08.04.2021	NEGATIVE
10	nCoV6L79646	AKASH CHOURASIA	22	M	NPS/TS	08.04.2021	NEGATIVE
11	nCoV6L79647	MEERA CHOURASIA	49	F	NPS/TS	08.04.2021	NEGATIVE
12	nCoV6L79648	RESHMA KULLU	21	F	NPS/TS	08.04.2021	NEGATIVE
13	nCoV6L79649	SUNIL KUMAR	25	M	NPS/TS	08.04.2021	NEGATIVE
14	nCoV6L79650	ASHOK KUMAR NAYAK	18	M	NPS/TS	08.04.2021	NEGATIVE
15	nCoV6L79651	LOURENTUS BAGE	54	M	NPS/TS	08.04.2021	NEGATIVE
16	nCoV6L79652	OLIVER SURIN	32	M	NPS/TS	08.04.2021	NEGATIVE
17	nCoV6L79653	AMREN BAGE	52	M	NPS/TS	08.04.2021	NEGATIVE
18	nCoV6L79654	URBASI MUNDARI	21	F	NPS/TS	08.04.2021	NEGATIVE
19	nCoV6L79655	VIKASH RAY	26	M	NPS/TS	08.04.2021	NEGATIVE
20	nCoV6L79656	SARITA AGARWAL	56	F	NPS/TS	08.04.2021	NEGATIVE

Checked and Approved by

 Department of Microbiology
 S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

 Dept. of Biochemistry
 SCB Medical College, Cuttack

 Professor & Head
 Department of Microbiology
 S. C. B. Medical College, Cuttack

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. There repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentation or for Publication in any Journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune
