

Test Report

Date and time of reporting (dd/mm/yyyy) : 12 hour format	12/04/2021
Address of the referring facility/Hospital	CDM & PHO, ROURKELA
SPECIMEN DETAILS	
Date & Time of receipt of specimen at State VRDL, SCBMCH (dd/mm/yyyy)	10/04/2021
Condition of specimen received / Quality on arrival	Under cold chain
REPORTING DETAILS	

Sl. No.	Sample ID	Patient Name	Age	Sex	Specimen type	Date of sample testing	Result 2019-nCoV RTPCR
1	nCoV7L06987	NANDA KUMAR SINGH	60	M	NP. Swab	11/4/2021	NEGATIVE
2	nCoV7L06988	SUJIT SINGH	32	M	NP. Swab	11/4/2021	NEGATIVE
3	nCoV7L06989	RAJ KISHOR PURTY	19	M	NP. Swab	11/4/2021	NEGATIVE
4	nCoV7L06990	SUDHANSU SEKHAR SAMAL	25	M	NP. Swab	11/4/2021	NEGATIVE
5	nCoV7L06991	MANAS RANJAN MAHAKUD	30	M	NP. Swab	11/4/2021	NEGATIVE
6	nCoV7L06992	JOSEP CHERIAN	64	M	NP. Swab	11/4/2021	NEGATIVE
7	nCoV7L06993	SHEELA JOSEP	59	F	NP. Swab	11/4/2021	NEGATIVE
8	nCoV7L06994	OAES KANTA NANDA	39	M	NP. Swab	11/4/2021	NEGATIVE
9	nCoV7L06995	GANESH BESRA	23	M	NP. Swab	11/4/2021	NEGATIVE
10	nCoV7L06996	PINKI KUMARI SHARMA	20	F	NP. Swab	11/4/2021	NEGATIVE
11	nCoV7L06997	RAJAN KUMAR CHOUDHURY	43	M	NP. Swab	11/4/2021	NEGATIVE
12	nCoV7L06998	PRASANT CHOUDHURY	26	M	NP. Swab	11/4/2021	NEGATIVE
13	nCoV7L06999	DEEPAK KUMAR CHOUDHURY	58	M	NP. Swab	11/4/2021	NEGATIVE
14	nCoV7L07000	SUSHANTA KUMAR PATRA	42	M	NP. Swab	11/4/2021	NEGATIVE
15	nCoV7L07001	BIKASH RANA	22	M	NP. Swab	11/4/2021	NEGATIVE
16	nCoV7L07002	AJAY KUMAR GUPTA	52	M	NP. Swab	11/4/2021	NEGATIVE
17	nCoV7L07003	GOBIND MAHATO	25	M	NP. Swab	11/4/2021	NEGATIVE

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Test Report

- Repeated sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeated specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Please ensure and maintain the confidentiality of the test report.
- Testing of referred clinical specimens was considered on the basis of request/referral received from/through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP) affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.*
- Repeated sampling and testing of lower respiratory specimens is strongly recommended in severe or progressive disease. There repeats specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing.*
- The sputum (if produced), endotracheal aspirate (ETA) or bronchoalveolar lavage (BAL) fluid would be appropriate for testing.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journal without the prior permission of the Director, ICMR-National Institute of Virology, Pune

Test Report
